80%
of car trips in urban
communities are shorter than
3-4 km

Cargo bikes are one piece of the pussle

Fossil free
Future

Part of a sustainable transport system

Flexible transport mode for day-to-day needs.

Short trips and last mile solutions.

Positive impacts and benefits

- Contributes to energy and climate goals
 - Reduced CO₂ emissions
 - Health improvement
 - Better air quality
 - Reduced traffic jams
 - Noise reduction
- Cost savings

How a city could lead the transition

Being a key driving force towards a sustainable transport system.

Findings

Bike librarys are an effective way of promoting cargo bikes

Direct placement or cargo bike pool

Cargo bikes come in very different shapes depending on area of use

Cargo bikes need more space

One cargo bike saves 5 ton of CO₂/yr

Short trips and multiple stops

20 - 40% will buy a cargo bike

Eight partners from four countries

Comes together in joint cross-border efforts to improve the quality and environmental sustainability of transport services in the South Baltic area
